# &ARCHITECTURE

# CODE OF CONDUCT

---

**These is how the &Architecture class will meet the Standards:**

1. Ethical Ambitions
   - Prioritise inclusion to enable a better future
   - Design responsibly to protect people and the environment
   - Individuals should be sensitive to differences in experiences, interests and expectations and respect the differences that make us unique

2. Creative Differences
   - Respect individuality and appreciate that differing backgrounds are equally important as your own
   - Challenge ideas with personal experience
   - Offer personal experiences that challenge existing thought and provide new perspectives from differing backgrounds

3. Shared Cities
   - Design with public interest first and eliminate the self from priority
   - Work horizontally and vertically to maximise collaboration

- Continue to offer your own opinions, thought and work to contribute and elevate the whole – a rising tide lifts all ships

4. Common Purposes
   - Work professionally and with respect to achieve a common goal
   - Contribute succinctly to add to the common notion
   - Accept that difference can cause conflict and aim to find common ground than enabling divide

5. Just Resources
   - Make decisions within to ensure contributions are worthwhile by providing clear understandable resources for the group
   - Offer thought that is respectful of differences
